

# OECD Schools+ Network

## Schools Welcome Pack

### Welcome!

This document is for all organisations and schools who have joined as participants of the OECD Schools+ Network. It aims to provide you with basic information about the expectations and activities of the Network, calendar and who's who.

The Schools+ Network is part of the OECD's [Global Teaching Insights](#) programme and co-developed with the OECD's [Development Centre](#).

## What to expect

### Schools+ Community

The Schools+ Community is where all the members will come together twice a year to share insights and collaborate on common challenges. The Community is comprised of representatives of governments (including ministries and local education bodies), organisations, research bodies and schools themselves.

The updated list of Schools+ participants [will be available here](#).

You can read the Summaries of the Community meetings from May 2023 and November 2023 [here](#).

### Schools Learning Circle

The Schools Learning Circle is where school level actors (teachers and school leaders) and experts come together to discuss innovations and improvements in teaching and learning. During the first biennium, the focus will be on

understanding innovations in pedagogy (classroom practice) and how and if these can be taken from one context to another.

## Communications

**Dissemination:** Each organisation (Ministry, IGO, NGO) is invited to share information about Schools+ events within their respective networks any schools who may be interested in joining the Schools learning circles or future activities. This may include our brochure and outputs as they are produced as part of our learning activities.

**Translation:** You are welcome to translate any Schools+ materials in your local languages. Please contact the Secretariat to inform them and obtain source files or other necessary resources.

**Spread the word:** We encourage you to share your Schools+ participation in your print and on-line communication channels (brochures, newsletters, webpages).

You are welcome to use one the Schools+ "badges" and social media cards to share the news (see the Visual resources section below for high resolution versions):

### Social media messages

You are welcome to use the following social media messages (as is or adaptations are also fine) to share the word about your participation in the Schools+ Network:

Please tag: @OECEduSkills & @OECDDev & [aponsv](#)

We've joined the #OECD's Schools+ Network, to imagine globally what education will look like tomorrow, put schools at the centre & build evidence together.
